

# SGA Self Declaration

Our end-to-end SGA Self Declaration (SD) supports compliance with the International Sustainability & Carbon Certification scheme without the messy paperwork.

## Single Input

Single input of declaration data is digitally transferred between parties for improved accuracy. SGA SDs are only required to be completed once per card, per Financial Year.

## Varieties

Growers can provide a declaration for several traded commodities. With completed SGA SDs able to be updated to include additional commodities during the same Financial Year.

## 24/7 Access

All SGA SDs are stored securely and accessible online 24/7. With subscribed to SGA SDs remaining available within myNGR - even if the card is de-listed.

## Annual

A SGA SD can be completed by Growers anytime before delivery and then used by any Trader who is participating in the Sustainable Grain Australia scheme for that Financial Year.

## Added Features

- Access to SGA Self Declarations can only be acquired if a Data Subscriber has subscribed to the supplied Grower's NGR card number.
- SGA Self Declarations can be viewed on-screen, or in downloadable formats via the myNGR portal or API as a PDF, csv, xml or json file.
- Via mobile, tablet or computer, wherever you have an internet connection, a SGA Self Declaration can be completed.

## About NGR

Since 2002 NGR has provided a simple, secure and streamlined online business register for users throughout Australia. Our service has revolutionised how the industry interacts – reducing administration and duplication for Growers and Data Subscribers across the Australian Agriculture supply chain.
