

# NGR

NATIONAL GROWER REGISTER

*Secure  
Streamlined  
Simple*

Since 2002 NGR has provided a simple, secure and streamlined online business register for users throughout Australia. Our service has revolutionised how the industry interacts – reducing administration and duplication for Growers and Data Subscribers across the supply chain.

# About NGR

Born from an industry requirement for a central register in the 1990s, NGR formally came into existence in 2002, and today continues to reduce the administrative burden for over 47,396+ users.

NGR’s mission is to provide stakeholders across the entire Australian Agricultural supply chain with efficient, simple, secure and trusted data management services by facilitating the flow of information between users in a seamless, transparent and authorised way.

The NGR platforms connect the industry through robust quality data and intuitive system intelligence to empower business relationships for a strong, technology-driven future for Australian Agriculture.

# When you’re ready

We would love to hear from you about how your organisation can utilise the NGR platform and products to simplify your operations.

✓ Advocates of **Data Sovereignty** with all data being stored locally to ensure compliance with Australian data and information privacy obligations.

✓ **Process and systems innovation** that provides industry-leading solutions for an ever-changing sector.

✓ **Multi-pathway user accessibility** across devices and integration with in-house systems, **Australia-wide**.

✓ **Friendly Queensland-based** Support Team.

✓ Industry embraced and widely recognised as a **trusted and integral** part of Australian Agriculture.

# 47,396+ USERS

# OUR PRODUCTS

NGR is ingenious in their approach to providing solutions and making business administration tasks simplified. With an innovative platform, electronic forms, processes and an inclusive approach that make doing business easier including:

myNGR supports the industry by providing access to current and reliable business and payment information for Growers across Australia to a wide range of agricultural businesses.

eDOCS streamlines the process of completing industry forms for the delivery of grain between growers, traders and end-users. Making industry documents that meet compliance regulations more accessible and easier to complete for both growers and traders, eliminating errors and limiting risk.

## SGA SELF DECLARATION

ISCC with Sustainable Grain Australia. This single electronic Sustainability Self Declaration to suit the ISCC requirements for International Trade of Sustainable commodities, has streamlined the process for the grower, by only requiring the completion of one form for the various traders they deal with.

## HARVEST DECLARATION

Harvest Declaration (HD) project to collect data in a streamlined process on behalf of Royalty Managers (Seed Breeders). This option has over a 75% return rate and means Growers don't have to complete multiple forms when advising of their Harvest information.

## COMMODITY DECLARATION

The end-to-end Commodity Vendor Declaration (CVD) form is a single input declaration that is digitally transferred from a grower, via a trader and on to the end user. By using the digital CVD within myNGR, it limits the duplication and risk of error in passing physical documentation through this multi-touchpoint process of trades.

# OUR SERVICES

It's time to ditch the spreadsheets and databases trying to keep track of Growers' details. When the pressure is on the last thing you need to do is question or update the information you do have. NGR already provides more than 180 businesses from across Australia with secure, easy to use access to Growers' details that they are doing business with.

## ACCURACY

NGR ensure quality-assured data management. With all updates being quality assured for accuracy prior to record changes being enacted.

## INTEGRITY

Utilising single source and automated management where possible, automated and structured data cleansing activities ensure all data remains in a consistent, current and structured manner.

## SECURITY

Stringent and best practice application surrounding system security and data storage/provisioning including regular penetration & social engineering testing, database health checks and full record audits.

## INDUSTRY PARTNERSHIPS

NGR partners with stakeholders across Australian Agriculture to develop and provide innovative solutions to industry problems. By undertaking a collaborative and considered approach, NGR has built long-term relationships with Industry Bodies, Trade Agencies, as well as Data Subscribers and Grower Groups. For more information on the various partners utilising NGR's innovative services, visit our website [ngr.com.au](http://ngr.com.au).

# THE DATA

## WITH GROWER CONSENT

A Grower must provide a Data Subscriber with their NGR Card Number in order to have access to shared information.

## DATA ACCESS OPTIONS

Accessible pathways provide the ability for customers to interact with NGR through many varied avenues including web portal, API integration and the availability of a Queensland-based support centre.

## DATA INTEGRITY PROTOCOLS

- Secure, direct communication channel with Growers.
- Approval processes for changes.
- Quality Control measure for any processing done by the team.
- Data Security - T4 Sites cloud platforms, and penetration testing.

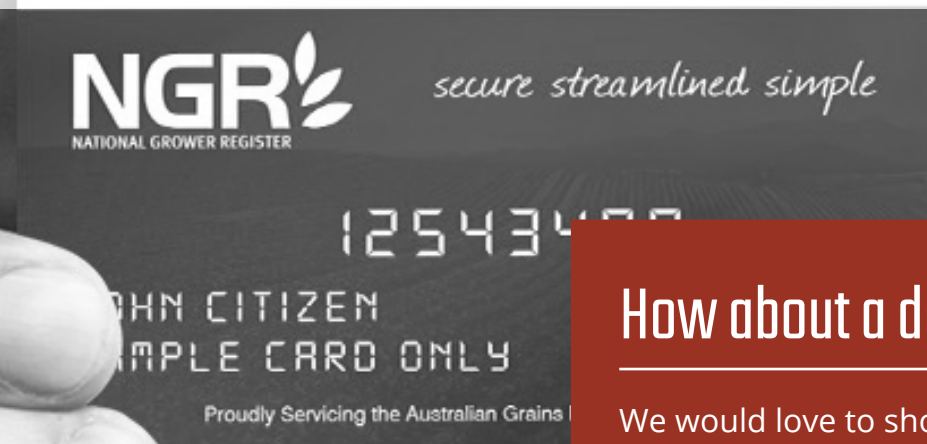

# THE FEES

For as little as 3c per Grower per day, in your subscription list, you also have complete control over your myNGR account – all backed up with personal service from the NGR team. For current pricing, terms and conditions please refer to our website [ngr.com.au](http://ngr.com.au).

# LET'S TALK

At this stage, we've covered that the myNGR system and products offer a cost-effective, secure way to acquire accurate Grower details. We offer a powerful data management solution for a small investment. Additionally, NGR's systems and practices keep pace with the evolution of data privacy and the ethical use of information. Why risk potential issues with storing sensitive data, when as a NGR Data Subscriber, you can rest assured that we are following the requirements for data and privacy.

## How about a demo?
