Subject: Important Update: Deprecation and Support Changes for Download Options

As NGR continue to adapt to customer requirements and shifting requirements the number of download files we offer continues to grow and adjust. This email outlines some important changes to our download options and API calls based on our comprehensive review of current utilisation. To streamline our services and ensure optimal performance, security, and a manageable testing regime of our releases, we will be making the following changes:

Deprecation and Unsupported Items (Effective Immediately):

We have identified certain download files, file types, and API calls that we believe are no longer in use by any Data Subscriber and as such we can deprecate these items with no impact. While these may be immediately deprecated, work to remove them will be completed within available slots within our backlog. These include,

Unsupported and to be Deprecated 2 January 2027:

The following download files and API calls are used in extremely low volumes and alternate options exist. We will not fix these should they break and will remove them on or after the 2nd of January 2027.

As can be seen our XML offering is coming to an end and we will in future look to provide CSV via the Portal and JSON via API.

What You Need to Do:

- Review the list of affected items and ensure that any dependencies on these items are addressed before the removal date.

- Plan for the transition to supported options and update your systems accordingly which can be found within our updated Web Services Agreement.

We appreciate your cooperation and understanding as we work to improve our services. If you have any questions or concerns, please do not hesitate to contact us.
